

THANKS GIVING AND WAY FORWARD:

Once more, the flower whose petals had shrunk opens them up and starts out for joy. A long journey this has been especially from the days when school was just a vision in my life since the fees were as invisible as snow in a desert. BUT thanks be to God who has kept my feet move forward with the soul and eyes focused on the way to success.

As any farmer who at last harvests a great yield, he undergoes many challenges but he persists. challenges continuously come across my way such as bad peer influence where, by boys and girls want me to join coupling, teasing, playing cards and also join the gang of thieves who swore to God that poverty would never catch up with them.

In those great trials and temptations, poverty arose on my side, for I was living among the rich who led whatever that I needed such as cars and drinks plus change of shoes time after time. But, glory be to God who kept my heart satisfied and convinced that all was well.

All in all, step by step I moved till when I sat for my UCE exams and I managed to score Agg 24, Grade 1 in those exams. It was not my power neither was it my authority but the grace of my Lord Jesus Christ who has kept my feet move up to this far.

I am looking forward to doing a combination of either - PCB/ICT, PCM/ICT or BOM/ICT. On this matter, I am so sure that God who has moved me to this point is more than ready to stand on my side.

As I do conclude, thank you for all you have done to see to it that I am educated and life is good. May the living God richly bless the works of your hands.

Sy;
B. B. B.
